# Look at That Knot!

## Page "LION" Fencing

The Page "LION" knot is bent so that it securely holds the stay and line wires in place and yet does not break the heavy galvanizing. It is extremely strong and cannot slip and is one of the most important features of the fence. The marginal line wires being made of the best carbon spring steel are springy and elastic and Page "LION" fences absolutely will not sag. Page "LION" wire is heavily coated with the best quality of galvanizing and it is as rust-proof as fencing can be made. There is not a weak point in Page "LION" Fencing—which is not a claim but an established fact. Call and see Page "LION" for corral, hog, stock, poultry and all other purposes.
